

GP03 – Discrepancy List

Class Diagram

1. Changed the AgentControl fields from private to public attributes to allow the ManagerControl to have access to them as it will inherit from the AgentControl
2. ManagerControl and Manager Border inherit from AgentControl and AgentBorder, respectively.
3. Changed the quantitative relationship between CustomerEntity and CreditCardEntity from (infinite number of customers to 1 credit card) to a (1 to 1 relationship).
4. Removed the EFLDatabaseBorder and EFL DatabaseInterface
5. Changed the AgentControl Entity class fields to ArrayLists as they will need to have a copy of all currentCustomers Loaded Locally.
6. Added EFLDatabase Instance to the AgentControl
7. Added Flights Entity class and AirportEntityClass
8. Removed ManagerEntity and added a Boolean called isManager to AgentClass to substitute.
