

Let's Hope This Works

IP02 Summary

This project went much smoother than the last one because of our increase in communication. The addition of the dropbox file to keep a copy of the files centrally located is one way in which we achieved this syncope. Meetings and utilizing our resources were vital to our success on the individual project. The lack of communication and our lack of seeking help from one another was what ultimately led to our lack of success on our last project.

Experiencing this failure as a team and learning from it propelled this project to go a lot smoother and we had fewer hiccups because of it. Overall we improved exponentially as a group in our ability to come together put together a cohesive plan then execute that plan without having by setting a set of goals and deadlines. The project as a whole came together smoothly from the inception with fewer obstacles due to the increase in team meetings to help everyone understand what the requirements were. One way we pushed to improve the design was to implement a flow chart to make sure we didn't have one event being handled by more than one person or by nobody. Once the design was in place simply had to execute and it worked like clockwork. This project has helped us understand the roles we will play in the Full size team projects we will be a part of for the remainder of this semester.
